EXECUTIVE SUMMARY

The Agricultural and Food Policy Center (AFPC) at Texas A&M University develops and maintains data to simulate 94 representative crop, dairy, and livestock operations in major production areas in 30 states. The chief purpose of this analysis is to project the economic viability of those farms by region and commodity for 2020 through 2025. The data necessary to simulate the economic activity of these operations are cultivated through ongoing cooperation with panels of agricultural producers in selected states. The Food and Agricultural Policy Research Institute (FAPRI) provides projected prices, policy variables, and input inflation rates in their June 2020 Baseline Update.

Under the June 2020 Baseline Update, 23 of the 64 crop farms are in good liquidity condition (less than a 25 percent chance of negative ending cash reserves by 2025). Ten crop farms have between a 25 percent and a 50 percent likelihood of negative ending cash reserves, and the remaining 31 crop farms have greater than a 50 percent chance of negative ending cash reserves. Additionally, 40 of the 64 crop farms are in good equity position (less than a 25 percent chance of decreasing real net worth during the study period). Eleven crop farms have between a 25 percent and 50 percent likelihood of losing real net worth, and thirteen crop farms have greater than a 50 percent probability of decreasing real net worth by 2025. The following discussion provides an overall evaluation by commodity considering both liquidity and equity measures.

- FEEDGRAIN FARMS: Nine of the 25 feedgrain farms are in good overall financial condition. Eight farms are classified in marginal condition, and eight are in poor condition.
- WHEAT FARMS: Five representative wheat farms are classified in good overall financial condition, four are in marginal condition, and two are in poor condition.
- COTTON FARMS: Seven of the 13 cotton farms are classified in good condition, one is in marginal condition, and five are in poor condition.
- RICE FARMS: Two of the 15 rice farms are projected to be in good financial condition. Six rice farms are projected to be in marginal condition; seven are in poor condition.
- DAIRY FARMS: Thirteen of the 20 dairies are in good overall financial condition. One dairy is classified in marginal condition, and six are in poor condition.
- BEEF CATTLE RANCHES: Five of the 10 cattle ranches are classified in good financial condition, three are projected to be in marginal condition, and two are in poor condition.

**REPRESENTATIVE FARMS ECONOMIC
OUTLOOK FOR THE JUNE 2020
FAPRI/AFPC BASELINE**

The farm-level economic impacts of the FAPRI June 2020 Baseline on representative crop and livestock operations are projected in this report, assuming provisions of the 2018 Farm Bill are in effect and continue throughout the 2020-2025 study period. This iteration of the FAPRI June 2020 Baseline includes impacts of the U.S.-China Phase 1 trade deal along with current assumptions associated with the COVID-19 pandemic on agricultural markets. The current representative farm analysis output reflects an evaluation of ARC/PLC program elections for the farms given provisions of the 2018 Farm Bill. Producers are currently assumed to enroll in the program resulting in the highest ending cash reserves at the end of the projection period; as farm update meetings are completed, adjustments will be made to program elections as needed. Full Market Facilitation Program (MFP) payments for 2018 and 2019 were included in this analysis along with Coronavirus Food Assistance Program (CFAP) payments for 2020 on eligible inventory and/or production. The analysis was conducted using whole farm simulation models developed by AFPC with necessary data sourced from:

- Producer panel cooperation to develop economic information to describe and simulate representative crop, livestock, and dairy farms, and
- Projected prices, policy variables, and input inflation rates from the Food and Agricultural Policy Research Institute (FAPRI) June 2020 Baseline Update.

The policy simulation model incorporates the historical risk faced by farmers for prices and production. This report presents the results of the June 2020 Baseline in a risk context using selected simulated probabilities and ranges for annual net cash farm income values. The probability of a farm experiencing negative ending cash reserves and the probability of a farm losing real net worth are included as indicators of the cash flow and equity risks facing farms through the year 2025.

This report is organized into ten sections. The first section summarizes the process used to develop the representative farms and the key assumptions utilized for the farm level analysis. The second section summarizes the FAPRI June 2020 Baseline and the policy and price assumptions used for the representative farm analyses. The third through sixth sections present the results of the simulation analyses for feed grain, wheat, cotton, and rice farms. The seventh and eighth sections summarize simulation results for dairy and cattle. Two appendices constitute the final sections of the report. Appendix A provides tables to summarize the physical and financial characteristics for each of the representative farms. Appendix B provides the names of producers, land grant faculty, and industry leaders who cooperated in the panel interview process to develop the representative farms.

Panel Process

AFPC has developed and maintains data to simulate 94 representative crop farms, dairies, and livestock operations chosen from major production areas across the United States (Figure 7). Characteristics for each of the operations in terms of location, size, crop mix, assets, and average receipts are summarized in Appendix A. The locations of these farms are primarily the results of discussions with staffers for the U.S. House and Senate Agriculture Committees. Information necessary to simulate the economic activity on these representative farms is developed from panels of producers using a consensus-building interview process. Often, two farms are developed in each region using separate panels of producers: one is representative of moderate size full-time farm operations, and the second panel usually represents farms two to three times larger.

The data collected from the panel farms are analyzed using the whole farm simulation model (FLIPSIM II) developed by AFPC. The producer panels are provided pro-forma financial statements for their representative farm and are asked to verify the accuracy of simulated results for the past year and the reasonableness of a five-year projection. Each panel must approve the model's ability to reasonably reflect the economic activity on their representative farm prior to using the farm for policy analysis.

A majority of the farms used in the analysis have been updated through panel discussions in the last three

years. All of the crop farms are assumed to begin 2017 with 20 percent intermediate-term and long-term debt. Initial debt levels in 2017 for dairy farms were set at 30 percent and initial debt levels for beef cattle ranches were 1 percent for land and 5 percent for cattle and machinery. The debt levels the farms have at the outset of 2017 are based on a stratified tabulation of the ERS-USDA Farm Cost and Returns Survey (using the survey data for moderate to large size farms in states where AFPC has representative farms) and panel member input.

Figure 1. Representative Farms and Ranches

Key Assumptions of Report

- All farms classified as moderate scale are the size (acres or number of livestock) considered to be representative of a majority of full-time commercial farming operations in the study area. In many regions, a second farm two to three times larger than the moderate scale farm is developed as an indicator of size economies.
- The farm level simulation model incorporates price and yield risk faced by farmers. Historical yield variability for crops and production for livestock (sale weights, birth rates, and milk per cow) over the past ten years are assumed to prevail for the planning horizon. Random crop, livestock, and milk prices are simulated using the June 2020 Baseline by FAPRI as the forecast of average prices. Prices reflect national price volatility caused by international production and demand as well as U.S. production risk.
- Historical crop yields (2019) were held constant based on actual values obtained from the producers. Crop yields for 2020-2025 were simulated stochastically based on the average yields provided by the producers and the historical yield variability for the farm. Prices were held constant at producer-provided values for 2018. FAPRI's June 2020 Baseline prices were localized for the farms and used as the average prices for 2020-2025 to simulate stochastic crop and livestock prices.
- Dairy and beef cattle herd sizes were held constant for all farms over the 2020-2025 planning horizon.
- Starting in 2018, all farms are subject to 4 payment limits on ARC, PLC, and Marketing Loan combined payments.
- The farm is subject to owner/operator federal (income and self-employment) and applicable state income taxes as a sole proprietor, based on the current income tax provisions.
- No off-farm income, including family employment, was included in the analyses. Therefore, the farm reflects only the ability of the farm to provide for family living and capital replacement.
- Farm program parameters, average annual prices, crop and livestock yield trends, interest rates, and input cost inflation (deflation) are based on the FAPRI June 2020 Baseline which incorporates the provisions of the 2018 Farm Bill.
- Marketing loan provisions for covered commodities were authorized in the 2008 Farm Bill and continued in the 2018 Farm Bill and are assumed to be in place for the farm level analysis.
- The current representative farm analysis output reflects an evaluation of ARC/PLC program elections for the farms given provisions of the 2018 Farm Bill. Producers are currently assumed to enroll in the program resulting in the highest ending cash reserves at the end of the projection period; as farm update meetings are completed, adjustments will be made to program elections as needed.
- Dairies are assumed to enroll in the Dairy Margin Coverage at the \$9.50 for Tier I and \$5.00 for Tier II. Tier II was limited to the minimum coverage needed maximize Tier I production and minimize Tier II coverage expense.
- Actual average loan deficiency payment (LDP) rates in the counties where the representative farms are located are used when applicable.
- All crop farms are assumed to carry yield, revenue, or Catastrophic coverage (CAT) at levels common to the area.
- Market Facilitation Program (MFP) was assumed on all farms and dairies that had eligible acres and/or production in 2018 and 2019.
- Coronavirus Food Assistance Program (CFAP) payments were assumed for all farms, ranches, and dairies for 2020 on eligible inventory and/or production.

FAPRI JUNE 2020 BASELINE

Projected crop prices for FAPRI's June 2020 Baseline are summarized in Table 1. Most crop prices are projected to vary by a relatively small amount over the 2020-2025 period. Individual crop prices are projected to move as follows:

- Corn prices are projected to fall from a high of \$3.61/bu in 2019 to \$3.06/bu in 2020; before rising and ending at 3.35/bu in 2025.
- Wheat prices are projected to stay in a range of \$4.54/bu to \$4.67/bu over the period.
- Upland cotton lint prices are expected to bottom in 2020 at \$0.5221 and end 2025 at \$0.6442/lb.
- The all rice price rises from a low of \$11.99/cwt in 2021 staying around \$12.17/cwt from 2022 to 2025.
- Sorghum prices are projected to fall from a high of \$3.26/bu in 2018 to \$2.95/bu in 2020 before settling around \$3.08/bu for 2021-2025.
- Prices for Soybeans are expected to increase from \$8.00/bu in 2021 to \$8.53/bu in 2025.

Assumed loan rates and reference prices are reported in Table 1 and reflect the rates authorized in the 2018 Farm Bill.

Projected livestock prices and state and national milk prices for FAPRI's June 2020 Baseline are summarized in Table 2. Feeder cattle prices are projected to bottom in 2021 and increase thereafter, while milk prices are projected to rise from the low in 2021 to a peak in 2025. Cattle and milk prices are projected to move as follows:

- Feeder cattle prices are projected to fall from \$159.20/cwt in 2018 to a low of \$146.90/cwt in 2021 before increasing to \$171.52/cwt in 2025.
- Fed cattle prices decline from 2018 to 2021, and begin to increase thereafter ending 2025 at \$125.26/cwt.
- Culled cow prices bottom out at \$53.49/cwt in 2021 and rise to \$59.48/cwt in 2025.
- The all milk price is expected to peak in 2019 at \$18.63/cwt before falling to \$16.27/cwt in 2021. From the low in 2021, the national milk price rises to \$18.19/cwt in 2025.

Projected annual rates of change for variable cash expenses are summarized in Table 3. The rates of change in input prices come from FAPRI's June 2020 Baseline. Fertilizer prices are projected to fall in 2021 before increasing afterwards. Fuel prices are projected to fall sharply in 2020 before increasing from 2021 to 2025 with jumps over 5 percent in three of the five years. Projected annual rates of change in land values over the 2019 – 2025 period were provided by the FAPRI June 2020 Baseline and exhibit an overall decline over the projection period after 2021.

Definitions of Variables in the Summary Tables

- **Overall Financial Position, 2020-2025** -- As a means of summarizing the representative farms' economic efficiency, liquidity, and solvency position, AFPC classifies each farm as being in either a good, marginal or poor position. AFPC assumes a farm is in a good financial position when it has less than a 25 percent chance of a negative ending cash balance and a less than 25 percent chance of losing real net worth. If the probabilities of these events are between 25 and 50 percent the farm is classified as marginal. A probability greater than 50 percent places the farm in a poor financial position.
- **Change in Real Net Worth, 2020-2025** -- Annualized percentage change in the operator's net worth from January 1, 2020 through December 31, 2025, after adjusting for inflation. This value reflects the real annualized increase or decrease in net worth or equity for the farm over the planning horizon including changes in real estate values.
- **Government Payments/Receipts, 2020-2025** -- Sum of all farm program payments (PLC or ARC and marketing loan gains/loan deficiency payments) divided by total receipts received from the market plus PLC or ARC, marketing loan gains/loan deficiency payments, Dairy Margin Coverage (DMC) payments, crop insurance indemnities, and other farm related receipts.
- **Total Cash Receipts** -- Sum of annual cash receipts from all sources, including market sales, PLC or ARC payments, marketing loan gains/loan deficiency payments, DMC payments, crop insurance indemnities, and other farm related receipts.
- **Government Payments** -- Sum of annual PLC or ARC payments and marketing loan gains/loan deficiency payments for crops. Also included are lump sum disaster payments for livestock.
- **Net Cash Farm Income** -- Equals total cash receipts minus all cash expenses. Net cash farm income is used to pay family living expenses, principal payments, income taxes, self-employment taxes, and machinery replacement costs. The values in the tables are the averages for each year in the planning horizon.
- **Probability of Negative Ending Cash Balance** -- The number of times out of 100 that the farm's ending cash reserves before borrowing are less than zero. This probability is reported for each year to indicate how the cash flow risk for the farm changes over the planning horizon.
- **Ending Cash Reserves** -- Equals total cash on hand at the end of the year. Ending cash equals beginning cash reserves plus net cash farm income and interest earned on cash reserves less principal payments, federal taxes (income and self-employment), state income taxes, family living withdrawals, and actual machinery replacement costs (not depreciation).
- **Nominal Net Worth** -- Equity at the end of each year equals total assets including land minus total debt from all sources. Nominal net worth is not adjusted for inflation and averages are reported for each year in the planning horizon.
- **Probability of Decreasing Real Net Worth Over 2020-2025** -- The number of times out of 100 that real net worth at the end of 2025 is less than real net worth at the start of 2020.

APPENDIX A:

CHARACTERISTICS OF

REPRESENTATIVE FARMS

2019 CHARACTERISTICS OF PANEL FARMS PRODUCING FEED GRAINS AND OILSEEDS

- IAG1350** IAG1350 is a 1,350-acre northwestern Iowa (Webster County) grain farm. The farm is moderate-sized for the region and plants 880 acres of corn and 470 acres of soybeans annually. Sixty-seven percent of this farm's 2019 receipts come from corn production.
- IAG3400** This 3,400-acre large-sized grain farm is located in northwestern Iowa (Webster County). It plants 2,210 acres of corn and 1,190 acres of soybeans each year, realizing 66 percent of receipts from corn production.
- NEG2400** South-central Nebraska (Dawson County) is home to this 2,400-acre grain farm. This farm plants 1,600 acres to corn and 800 acres to soybeans. The farm splits its corn acres evenly between yellow and white food-grade corn. Sixty-eight percent of gross receipts are derived from corn sales.
- NEG4500** This is a 4,500-acre grain farm located in south-central Nebraska (Dawson County). This operation plants 3,000 acres of corn and 1,000 acres of soybeans each year. Remaining acres are planted to alfalfa. A portion (25 percent) of the corn acreage is food-grade corn. In 2019, 70 percent of total receipts were generated from corn production.
- NDG3000** NDG3000 is a 3,000-acre, moderate-sized, south central North Dakota (Barnes County) grain farm that plants 500 acres of wheat, 1,000 acres of corn, and 1,500 acres of soybeans. One hundred acres are enrolled in the Conservation Reserve Program. The farm generated 35 percent of 2019 receipts from soybean sales and 40 percent from corn sales.
- NDG9000** This is an 9,000-acre, large-sized grain farm in south central North Dakota (Barnes County) that grows 4,500 acres of soybeans, 2,500 acres of corn, 1,250 acres of wheat, and 500 acres of barley annually. The remaining acreage is enrolled in the Conservation Reserve Program. Soybean and corn sales accounted for 75 percent of 2019 receipts.
- ING1000** Shelby County, Indiana, is home to this 1,000-acre moderate-sized feedgrain farm. This farm annually plants 475 acres of corn, 525 acres of soybeans, and 50 acres of wheat that is double cropped with soybeans. Due to this farm's proximity to Indianapolis, land development pressures will likely constrain further expansion of this operation. Forty-eight percent of 2019 receipts came from corn sales.
- ING3250** ING3250 is a large-sized grain farm located in east central Indiana (Shelby County). This farm plants 1,625 acres to corn and 1,625 acres to soybeans each year. In 2019, 54 percent of gross receipts were generated by corn sales.
- OHG700** This is a 700 acre, moderate sized grain farm in north western Ohio (Henry County). This farm planted 105 acres of corn and 280 acres of soybeans in 2019. Because of the wet spring there were 315 acres that were not planted and was taken as preventive planting insurance. Normally would be 350 acres each of corn and soybeans. Twenty-one percent of 2019 receipts were generated by corn sales.
- OHG1500** This is a 1,500 acre, large-sized grain farm in north western Ohio (Henry County). This farm planted 202 acres of corn, 304 acres of soybeans, and 150 acres of wheat in 2019. Because of the wet spring there were 844 acres that were not planted and was taken as preventive planting insurance. Normally would be 675 acres each of corn and soybeans plus the 150 acres of wheat. Twenty percent of 2019 receipts were generated by corn sales.

*Receipts for 2019 are included to indicate the relative importance of each enterprise to the farm. Percents indicate the percentage of the total receipts accounted for by the livestock categories and the crops.

**Acreages for 2019 are included to indicate the relative importance of each enterprise to the farm. Total planted acreage may exceed total cropland available due to double cropping. Percents indicate the percentage of total planted acreage accounted for by the crop.

2019 PANEL FARMS PRODUCING FEED GRAINS AND OILSEEDS

- MOCG2300** MOCG2300 is a 2,300-acre grain farm located in central Missouri (Carroll County) and plants 1,150 acres of corn and 1,150 acres of soybeans annually. This farm is located in the Missouri River bottom, an area with a large concentration of livestock production. This farm generated 53 percent of its total revenue from corn and 39 percent from soybeans during 2019.
- MOCG4200** This is a 4,200-acre central Missouri (Carroll County) grain farm with 2,310 acres of corn and 1,890 acres of soybeans. This farm is located in the Missouri River bottom, an area with a large concentration of livestock production. Corn sales accounted for 59 percent of farm receipts and soybeans accounted for 32 percent in 2019.
- MONG2300** MONG2300 is a 2,300-acre diversified northwest Missouri grain farm centered in Nodaway County. MONG2300 plants 1,125 acres of corn, 1,125 acres of soybeans, and 50 acres of hay annually. The farm also has a 300-head cow-calf herd. Proximity to the Missouri River increases marketing options for area grain farmers due to easily accessible river grain terminals. In 2019, 46 percent of the farm's total receipts were from corn, 44 percent from soybeans, and 8 percent from cattle sales.
- LANG2500** This is a 2,500-acre northeast Louisiana (Madison Parish) diversified grain farm. This farm harvests 500 acres of rice, 875 acres of soybeans, 375 acres of cotton, and 750 acres of corn. For 2019, 44 percent of farm receipts came from corn and soybean sales.
- TNG2500** This is a 2,500-acre, moderate-sized grain farm in West Tennessee (Gibson County). Annually, this farm plants 1,025 acres of corn, 1,475 acres of soybeans, and 375 acres of wheat (planted before soybeans) in a region of Tennessee recognized for the high level of implementation of conservation practices by farmers. For 2019, 38 percent of farm receipts were from sales of corn and 43 percent from soybeans.
- TNG5000** West Tennessee (Gibson County) is home to this 5,000-acre, large-sized grain farm. Farmers in this part of Tennessee are known for their early and continued adoption of conservation practices, including no-till farming. TNG5000 plants 2,500 acres of corn, 500 acres of wheat, 2,500 acres of soybeans (500 of which are double-cropped after wheat). The farm generated 49 percent of its 2019 gross receipts from sales of corn and 35 percent from soybeans.
- NCSP2000** A 2,000-acre diversified farm located in southern North Carolina (Bladen County). NCSP2000 plants 400 acres of peanuts, 1,100 acres of corn, and 500 acres of soybeans. Fifty-two percent of receipts for this farm came from corn and soybean sales in 2019; forty-three percent of receipts came from peanut sales.
- NCC2030** This is a 2,030-acre grain farm located on the upper coastal plain of North Carolina (Wayne County). NCC2030 plants 400 acres of corn, 200 acres of wheat, and 1,000 acres of soybeans annually. Corn accounted for 21 percent of this farm's 2019 receipts, while soybeans accounted for 38 percent.
- SCC2000** SCC2000 is a moderate-sized, 2,000-acre grain farm in South Carolina (Orangeburg County) consisting of 800 acres of corn, 550 acres of cotton, 250 acres of peanuts, and 400 acres of soybeans. Forty-four percent of the farm's receipts were from corn sales during 2019.
- SCG3500** A 3,500-acre, large-sized South Carolina (Clarendon County) grain farm with 1,800 acres of corn, 750 acres of cotton, 600 acres of peanuts, and 350 acres of soybeans. The farm generated 46 percent of 2019 receipts from corn sales and 4 percent from soybean sales.

2019 PANEL FARMS PRODUCING FEED GRAINS AND OILSEEDS

- TXNP3450** This is a 3,450-acre diversified grain farm located on the northern High Plains of Texas (Moore County). This farm plants 1206 acres of cotton, 1,294 acres of irrigated corn, 260 acres of irrigated sorghum for seed production, and 432 acres of irrigated wheat annually. Forty-seven percent of total receipts are generated from corn sales.
- TXNP10880** TXNP10880 is a large-sized diversified grain farm located in the Texas Panhandle (Moore County). This farm annually plants 4,454 acres of cotton (3,962 irrigated/492 dryland); 3,962 acres of irrigated corn; 1,272 acres of grain sorghum (530 irrigated for seed production/492 dryland/250 irrigated for commercial use); and 492 acres of dryland winter wheat. Thirty-nine percent of 2019 cash receipts were derived from corn sales.
- TXPG2500** The Texas Panhandle is home to this 2,500-acre farm (Deaf Smith County). Annually, wheat is planted on 534 acres (350 irrigated and 184 dryland), 1,000 acres planted to irrigated corn, 783 acres are planted to cotton (600 irrigated and 183 dryland), and grain sorghum is planted on 183 dryland acres. Fifty-seven percent of 2019 cash receipts were generated by corn sales.
- TXHG3000** This 3,000-acre grain farm is located on the Blackland Prairie of Texas (Hill County). On this farm, 2,000 acres of corn, 500 acres of cotton, and 500 acres of wheat are planted annually. Grain sales accounted for 75 percent of 2019 receipts with cotton accounting for fourteen percent of sales. Forty beef cows live on 300 acres of improved pasture and contribute approximately eighteen percent of total receipts.
- TXWG1600** This 1,600-acre farm is located on the Blackland Prairie of Texas (Williamson County). TXWG1600 plants 800 acres of corn, 300 acres of sorghum, 400 acres of cotton, and 100 acres of winter wheat annually. Additionally, this farm has a 40-head beef cow herd that is pastured on rented ground that cannot be farmed. Grain sales accounted for 57 percent of 2019 receipts with cotton accounting for 33 percent of sales.

*Receipts for 2019 are included to indicate the relative importance of each enterprise to the farm. Percents indicate the percentage of the total receipts accounted for by the livestock categories and the crops.

**Acreages for 2019 are included to indicate the relative importance of each enterprise to the farm. Total planted acreage may exceed total cropland available due to double cropping. Percents indicate the percentage of total planted acreage accounted for by the crop.

2019 CHARACTERISTICS OF PANEL FARMS PRODUCING WHEAT

- WAW2800** This is a 2,800-acre moderate-sized grain farm in the Palouse of southeastern Washington (Whitman County). It plants 1,840 acres of wheat and 800 acres of dry peas. Disease concerns dictate rotating a minimum acreage of peas to maintain wheat yields. This farm generated 62 percent of 2019 receipts from wheat.
- WAW10000** A 10,000-acre, large-sized grain farm in the Palouse of southeastern Washington (Whitman County). Annually, this farm allocates 5,800 acres to wheat and 2,700 acres to dry peas. Diseases that inhibit wheat yield dictate the rotation of a minimum acreage of peas. Wheat sales accounted for 60 percent of 2019 receipts.
- WAAW5500** South-central Washington (Adams County) is home to this 5,500-acre, large-sized wheat farm. Annually, this farm plants 2,600 acres of wheat in a wheat-fallow rotation. Additionally, 300 acres are enrolled in CRP. In 2019, 91 percent of the farm's income came from wheat.
- ORW4500** ORW4500 is a 4,500-acre large-sized grain farm located in northeastern Oregon (Morrow County). This farm plants 2,250 acres annually in a wheat-fallow rotation. Eighty-six percent of this farm's 2019 total receipts came from wheat sales.
- MTW8000** North-central Montana (Chouteau County) is home to this 8,000-acre farm on which 3,840 acres of wheat (1,920 acres of winter wheat, 1,344 acres of spring wheat, and 544 acres of Durham), 240 acres of barley, and 720 acres of dry peas are planted each year. MTW8000 uses no-till production practices. In 2019, 66 percent of receipts came from wheat.
- KSCW2000** South central Kansas (Sumner County) is home to this 2,000-acre, moderate-sized grain farm. KSCW2000 plants 800 acres of winter wheat, 1,100 acres of soybeans, 200 acres of cotton, and 500 acres of corn each year. For 2019, 18 percent of gross receipts came from wheat.
- KSCW5300** A 5,300-acre, large-sized grain farm in south central Kansas (Sumner County) that plants 2,385 acres of winter wheat, 1,590 acres of corn, and 3,352 acres of soybeans. Twenty-one percent of this farm's 2019 total receipts were generated from sales of winter wheat.
- KSNW4000** This is a 4,000-acre, moderate-sized northwest Kansas (Thomas County) grain farm. This farm plants 1,200 acres of winter wheat (wheat-fallow rotation), 1,200 acres of corn, and 600 acres of sorghum. This farm generated 33 percent of 2019 receipts from wheat and 56 percent of its receipts from feed grains.
- KSNW7000** KSNW7000 is a 7,000-acre, large-sized northwest Kansas (Thomas County) grain farm that annually plants 1,700 acres of winter wheat, 3,770 acres of corn, 700 acres of sorghum, and 130 acres of soybeans. The farm generated 15 percent of receipts from wheat and 78 percent from feed grains during 2019.
- COW3000** A 3,000-acre northeast Colorado (Washington County), moderate-sized farm that plants 1,012 acres of winter wheat and 675 acres of corn each year. COW3000 has adopted minimum tillage practices on most of its acres. This farm generated 56 percent of its receipts from wheat and 36 percent from corn.
- COW6000** A 6,000-acre, large-sized northeast Colorado (Washington County) wheat farm. It plants 2,000 acres of wheat, 1,000 acres of millet, and 1,000 acres of corn. During 2019, 52 percent of gross receipts came from wheat sales and 23 percent came from corn sales.

*Receipts for 2019 are included to indicate the relative importance of each enterprise to the farm. Percents indicate the percentage of the total receipts accounted for by the livestock categories and the crops.

**Acreages for 2019 are included to indicate the relative importance of each enterprise to the farm. Total planted acreage may exceed total cropland available due to double cropping. Percents indicate the percentage of total planted acreage accounted for by the crop.

2019 CHARACTERISTICS OF PANEL FARMS PRODUCING COTTON

- TXSP4500** The Texas South Plains (Dawson County) is home to this 4,500-acre, large-sized cotton farm that grows 4,380 acres of cotton (2,880 dryland, 1,500 irrigated), and 120 irrigated acres of peanuts. Cotton sales comprised 77 percent of 2019 receipts.
- TXEC5000** This 5,000-acre farm is located on the Eastern Caprock of the Texas South Plains (Crosby County). Annually, 4,700 acres are planted to cotton (2,230 irrigated and 2,470 dryland) and 300 acres to dryland wheat. In 2019, cotton sales accounted for 76 percent of gross receipts.
- TXRP3000** TXRP3000 is a 3,000-acre cotton farm located in the Rolling Plains of Texas (Jones County). This farm plants 1,800 acres of cotton and 1,200 acres of winter wheat each year. The area is limited by rainfall, and the farm uses a conservative level of inputs. Sixty-six percent of 2019 farm receipts came from cotton sales. Fifty head of beef cows generated four percent of farm receipts.
- TXMC2500** This 2,500-acre cotton farm is located on the Coastal Plain of southeast Texas (Wharton County). TXMC2500 farms 300 acres of sorghum, 1,455 acres of cotton, and 655 acres of corn. In 2019, cotton sales comprised 60 percent of total cash receipts on this operation.
- TXCB3750** A 3,750-acre cotton farm located on the Texas Coastal Bend (San Patricio County) that farms 1,687.5 acres of cotton, 1,875 acres of sorghum, and 187.5 acres of corn annually. Forty-seven percent of 2019 cash receipts were generated by cotton.
- TXCB10000** Nueces County, Texas is home to this 10,000-acre farm. Annually, 4,500 acres are planted to cotton, 4,000 acres to sorghum, and 1,500 acres of corn. Cotton sales accounted for 49 percent of 2019 receipts.
- TXVC5500** This 5,500-acre farm is located in the lower Rio Grande Valley of Texas (Willacy County) and plants 2,550 acres to cotton (425 irrigated and 2,125 acres dryland), 2,295 acres to sorghum (170 irrigated and 2,125 dryland), and 255 acres of corn. In 2019, 41 percent of TXVC5500's cash receipts were generated by cotton sales.
- ARNC5000** This 5,000-acre farm is located in northern Arkansas (Mississippi County) and plants 2,500 acres to cotton, 500 acres to corn, 1,000 acres of soybeans, and 1,000 acres to peanuts. In 2019, 45 percent of ARNC5000's cash receipts were generated by cotton sales.
- TNC3000** A 3,000-acre, moderate-sized West Tennessee (Fayette County) cotton farm. TNC3000 consists of 825 acres of cotton, 1,375 acres of soybeans, and 800 acres of corn. Cotton accounted for 32 percent of 2019 gross receipts, with corn and soybeans contributing 24 percent and 28 percent, respectively.
- TNC4050** TNC4050 is a 4,050-acre, large-sized West Tennessee (Haywood County) cotton farm. This farm plants 1,500 acres of cotton, 1,950 acres of soybeans, 550 acres of corn, and 750 acres of wheat each year. During 2019, cotton sales generated 36 percent of gross receipts.

*Receipts for 2019 are included to indicate the relative importance of each enterprise to the farm. Percents indicate the percentage of the total receipts accounted for by the livestock categories and the crops.

**Acreages for 2019 are included to indicate the relative importance of each enterprise to the farm. Total planted acreage may exceed total cropland available due to double cropping. Percents indicate the percentage of total planted acreage accounted for by the crop.

2019 CHARACTERISTICS OF PANEL FARMS PRODUCING COTTON

- ALC3500** A 3,500-acre cotton farm located in northern Alabama (Lawrence County) that plants 1,050 acres to cotton, 1,050 acres to corn, 1,400 acres of soybeans and 875 acres to wheat (double cropped with soybeans) annually. This farm was early to adopt no-till cropping practices. Cotton sales accounted for 29 percent of total farm receipts during 2019.
- GAC2500** Southwest Georgia (Decatur County) is home to a 2,500-acre cotton farm that plants 1,250 acres to cotton, 800 acres to peanuts, and 450 acres to corn. In 2019, farm receipts were comprised of cotton sales (39 percent), corn (14 percent), and peanut sales (35 percent). The farm also runs a 125-head beef cow herd, generating 3 percent of 2019 receipts.
- NCNP1600** A 1,600-acre diversified farm located in northern North Carolina (Edgecombe County). NCNP1600 plants 320 acres of peanuts, 240 acres of corn, 640 acres of cotton, and 400 acres of soybeans. Twenty-six percent of receipts for this farm came from peanut sales in 2019, 42 percent from cotton sales and 22 percent came from corn and soybean sales.

2019 CHARACTERISTICS OF PANEL FARMS PRODUCING RICE

- CAR1200** CAR1200 is a 1,200-acre moderate-sized rice farm in the Sacramento Valley of California (Sutter and Yuba Counties) that plants 1,200 acres of rice annually. This farm generated 98 percent of 2019 gross receipts from rice sales.
- CAR3000** This is a 3,000-acre rice farm located in the Sacramento Valley of California (Sutter and Yuba Counties) that is large-sized for the region. CAR3000 plants 3,000 acres of rice annually. In 2019, all receipts were generated from rice sales.
- CABR1000** The Sacramento Valley (Butte County) is home to CABR1000, a 1,000-acre rice farm. CABR1000 harvests 1,000 acres of rice annually, generating 98 percent of 2019 farm receipts from rice sales.
- CACR800** CACR800 is an 800-acre rice farm located in the Sacramento Valley of California (Colusa County). This farm harvests 800 acres of rice each year. During 2019, 98 percent of farm receipts were realized from rice sales.
- TXR1500** This 1,500-acre rice farm located west of Houston, Texas (Colorado County) is moderate-sized for the region. TXR1500 harvests 600 acres of rice. The farm generated 96 percent of its receipts from rice during 2019.
- TXR3000** TXR3000 is a 3,000-acre, large-sized rice farm located west of Houston, Texas (Colorado County). This farm harvests 1,500 acres of rice annually. TXR3000 realized 97 percent of 2019 gross receipts from rice sales.
- TXBR1800** The Texas Gulf Coast (Matagorda County) is home to this 1,800-acre rice farm. TXBR1800 generally plants a third of its acres to rice annually and fallows the remainder. The farm generated 95 percent of its receipts from rice during 2019.
- TXER2500** This 2,500-acre rice farm is located in the Texas Gulf Coast (Wharton County). TXER2500 harvests 1,250 acres of rice each year. The farm also grows 1,250 acres of corn. Sixty-nine percent of 2019 receipts came from rice sales.
- LASR2000** A 2,000-acre southwest Louisiana (Acadia, Jeff Davis, and Vermilion parishes) rice farm, LASR2000 is moderate-sized for the area. This farm harvests 1,000 acres of rice and 200 acres of soybeans. During 2019, 56 percent of gross receipts were generated from rice sales.
- ARMR6500** ARMR6500 is a 6,500-acre diversified rice farm in southeast Arkansas (Desha County) that plants 650 acres of rice, 3,900 acres of soybeans, and 1,950 acres of corn. For 2019, 13 percent of gross receipts came from rice sales, 27 percent from corn sales, and 48 percent from soybean sales.

2019 CHARACTERISTICS OF PANEL FARMS PRODUCING RICE

- ARSR3240** ARSR3240 is a 3,240-acre, large-sized Arkansas (Arkansas County) rice farm that harvests 1,458 acres of rice, 1,458 acres of soybeans, and 324 acres of corn each year. Fifty-nine percent of this farm's 2019 receipts came from rice sales.
- ARWR2500** East central Arkansas (Cross County) is home to this 2,500-acre rice farm. Moderate-sized for the region, ARWR2500 annually plants 1,250 acres each to rice and soybeans. During 2019, rice sales generated 63 percent of gross receipts.
- ARHR4000** ARHR4000 is a 4,000-acre large-sized northeast Arkansas (Lawrence County) rice farm that annually harvests 2,400 acres of rice, 1,400 acres of soybeans, and 200 acres of corn. Rice sales accounted for 75 percent of 2019 farm receipts.
- MSDR5000** MSDR5000 is a 5,000-acre Mississippi Delta (Bolivar County) rice farm that annually harvests 1,667 acres of rice and 3,333 acres of soybeans. Rice sales accounted for 39 percent of 2019 farm receipts. Soybeans account for 43 percent of receipts.
- MOBR4000** MOBR4000 is a 4,000-acre Missouri Bootheal (Pemiscot County) rice farm. The farm annually harvests 1,320 acres of rice, 1,800 acres of soybeans and 880 acres of corn. Rice sales accounted for 47 percent of farm receipts in 2019.

2019 CHARACTERISTICS OF PANEL FARMS PRODUCING MILK

- CAD2000** A 2,000-cow, large-sized central California (Tulare County) dairy, the farm plants 975 acres of hay/silage for which it employs custom harvesting. Milk sales generated 90 percent of 2019 total receipts.
- WAD300** A 300-cow, moderate-sized northern Washington (Whatcom County) dairy. This farm plants 250 acres of silage and generated 90 percent of its 2019 gross receipts from milk sales.
- WAD1200** A 1,200-cow, large-sized northern Washington (Whatcom County) dairy. This farm plants 850 acres for silage annually. During 2019, 89 percent of this farm's gross receipts came from milk.
- IDD1500** A 1,500-cow, large-sized dairy located in the Magic Valley of Idaho (Twin Falls County). This farm plants 550 acres of corn silage and 300 acres of hay annually. Milk sales account for 88 percent of 2019 gross receipts.
- NVD1000** A 1,000-cow, moderate-sized Nevada (Churchill County) dairy. This farm plants 475 acres of hay and 200 acres of corn silage annually. Milk sales accounted for 95 percent of NVD1000's gross receipts for 2019.
- TXND3800** A 3,800-cow, large-sized dairy located in the South Plains of Texas (Bailey County). This farm plants 1,920 acres of corn silage annually. Milk sales account for 90 percent of 2019 gross receipts.
- TXCD1500** A 1,500-cow, large-sized central Texas (Erath County) dairy, TXCD1500 plants 416 acres of silage and 500 acres of hay annually. During 2019, milk sales accounted for 94 percent of receipts.
- TXED400** A 400-cow, moderate-sized northeast Texas (Hopkins County) dairy. This farm has 200 acres of hay. During 2019, milk sales represented 87 percent of annual receipts.
- WID180** A 180-cow, moderate-sized eastern Wisconsin (Winnebago County) dairy, the farm plants 120 acres of silage, 50 acres for hay, 200 acres of corn, 100 acres of wheat, and 180 acres of soybeans. Milk constituted 76 percent of this farm's 2019 receipts.
- WID1700** A 1,700-cow, large-sized eastern Wisconsin (Winnebago County) dairy, the farm plants 850 acres of haylage, 1,000 acres of silage, 75 acres of soybeans, 150 acres of wheat, and 1,200 acres of corn. Milk sales comprised 88 percent of the farm's 2019 receipts.
- OHD350** A 350-cow, moderate-sized central Ohio (Gonzalez County) dairy, the farm plants 575 acres of silage, 200 acres of corn, 50 acres of soybeans, and 50 acres of wheat. Milk sales comprised 82 percent of the farm's 2019 receipts.

*Receipts for 2019 are included to indicate the relative importance of each enterprise to the farm. Percents indicate the percentage of the total receipts accounted for by the livestock categories and the crops.

**Acreages for 2019 are included to indicate the relative importance of each enterprise to the farm. Total planted acreage may exceed total cropland available due to double cropping. Percents indicate the percentage of total planted acreage accounted for by the crop.

2019 CHARACTERISTICS OF PANEL FARMS PRODUCING MILK (continued)

- NYWD400** A 400-cow, moderate-sized western New York (Wyoming County) dairy. This farm plants 50 acres of corn, 750 acres of silage, and double crops 425 acres of haylage annually. Milk sales accounted for 95 percent of the gross receipts for this farm in 2019.
- NYWD1200** A 1,200-cow, large-sized western New York (Wyoming County) dairy. This farm plants 1,900 acres of silage and 200 acres of corn annually. Milk sales accounted for 97 percent of the gross receipts for this farm in 2019.
- NYCD180** A 180-cow, moderate-sized central New York (Cayuga County) dairy. This farm plants 50 acres of corn, and 350 acres of silage annually. Milk sales accounted for 78 percent of the gross receipts for this farm in 2019.
- NYCD800** A 800-cow, large-sized central New York (Cayuga County) dairy. This farm plants 950 acres of silage and 850 acres of hay annually. Milk sales accounted for 88 percent of the gross receipts for this farm in 2019.
- VTD160** A 160-cow, moderate-sized Vermont (Washington County) dairy. VTD160 plants 25 acres of hay and 235 acres of silage annually. Milk accounted for 89 percent of the 2019 receipts for this farm.
- VTD400** A 400-cow, large-sized Vermont (Washington County) dairy. This farm plants 75 acres of hay and 600 acres of silage annually. Milk sales represent 81 percent of VTD400's gross receipts in 2019.
- MOGD550** A 550-cow, grazing dairy in southwest Missouri (Dade County), the farm grazes cows on 300 acres of improved pasture cut for hay. The dairy uses minimal inputs with 9,000 lbs of milk per cow. Milk accounted for 64 percent of gross farm receipts for 2019.
- FLND550** A 550-cow, moderate-sized north Florida (Lafayette County) dairy. The dairy grows 130 acres of hay and 200 acres of silage each year. All other feed requirements are purchased in a pre-mixed ration. Milk sales accounted for 85 percent of the 2019 farm receipts.
- FLSD1750** A 1,750-cow, large-sized south-central Florida (Okeechobee County) dairy, FLSD1750 plants 200 acres of corn and 130 acres of hay. Milk sales represent 85 percent of 2019 total receipts.

2019 CHARACTERISTICS OF PANEL RANCHES PRODUCING BEEF CATTLE

- NVB650** NVB650 is a 650-cow ranch located in northeastern Nevada (Elko County). The operation consists of 1,300 acres of owned hay meadow and 8,725 acres of owned range, supplemented by 3,560 AUMs of public land. Each year, the ranch harvests 975 acres of hay. Annually, cattle sales represent 92 percent of the ranch's receipts.
- NVSB550** NVSB550 is a 550-cow ranch located in southeastern Nevada (Lincoln County). The operation consists of 125 acres of owned hay meadow and 375 acres of owned range, supplemented by 7,600 AUMs of public land. Annually, cattle sales represent 90 percent of the ranch's receipts.
- MTB600** A 600-cow ranch located on the eastern plains of Montana (Custer County), MTB600 runs cows on a combination of owned land and land leased from federal, state, and private sources. The ranch owns 14,000 acres of pasture. 800 acres of hay are produced annually. Also, all deeded acres are leased for hunting. Cattle sales represented 82 percent of this ranch's 2019 receipts.
- WYB475** This 475-cow ranch is located in north central Wyoming (Washakie County). The ranch leases 2750 AUMs from the U.S. Forest Service and owns 1,500 acres of range. Annually, the ranch harvests 315 acres of alfalfa and grass hay on owned ground. In 2019, cattle sales accounted for 92 percent of gross receipts.
- COB275** This 275-cow ranch is located in northwestern Colorado (Routt County). Federal land provides seven percent of the ranch's grazing needs. The ranch owns 2,300 acres of rangeland, and the cattle graze federal land during the summer. Cattle sales accounted for 58 percent of the ranch's 2019 total receipts.
- NMB210** NMB210 is a 210-cow ranch located in northeastern New Mexico (Union County). During 2019, 95 percent of gross receipts were derived from cattle sales with the balance of receipts generated from fee hunting.
- SDB600** SDB600 is a 600-cow West River (Meade County, South Dakota) beef cattle ranch. This operation produces hay on 1,000 acres of owned cropland, and runs its cows on 6,500 acres of owned native range. In 2019, cattle sales accounted for 96 percent of gross receipts.
- MOB250** A 250-cow beef cattle operation is the focal point of this diversified livestock and crop farm located in southwest Missouri (Dade County). MOB250 plants 160 acres of corn, 160 acres of wheat, and 200 acres of soybeans. Improved pasture makes up another 570 acres of this ranch. During 2019, cattle sales comprised 44 percent of gross receipts.
- TXRB400** The western Rolling Plains of Texas (King County) is home to this 400-head cow-calf operation. This ranch operates on 20,000 acres (half owned, half leased) of native range. Eighty-one percent of 2019 receipts came from cattle sales, while 19 percent came from fee hunting.
- TXSB300** A 300-head cow-calf operation is the central focus of this full-time agricultural operation in south central Texas (Gonzales County). Contract broiler production and hunting income are vital to the ranch's viability. Cattle sales accounted for 86 percent of 2019 gross receipts.
- OTHERS** Five other representative farms have beef cattle operations along with their crop production (MONG2300, TXHG2700, TXWG1600, TXRP2500, and GAC2300). These farming operations have from 40 to 300 cows. Cattle contributed approximately 10 percent of gross receipts for these farms in 2019.

*Receipts for 2019 are included to indicate the relative importance of each enterprise to the farm. Percents indicate the percentage of the total receipts accounted for by the livestock categories and the crops.

**Acreages for 2019 are included to indicate the relative importance of each enterprise to the farm. Total planted acreage may exceed total cropland available due to double cropping. Percents indicate the percentage of total planted acreage accounted for by the crop.

APPENDIX B:

LIST OF PANEL FARM

COOPERATORS

FEED GRAIN FARMS

Indiana

Facilitators

Mr. Scott Gabbard - Extension Educator, Shelby County, Purdue Cooperative Extension

Panel Participants

Mr. David Brown
Mr. Gary Everhart
Mr. Jason & Dan Foltz
Mr. Darrell Linville
Mr. Gary Robards
Mr. Michael Steinbarger
Mr. Keith Theobald

Mr. Kevin Carson
Mr. Richard Fix
Ms. Carmen Hawk
Mr. Mark Nigh
Mr. Ken Simpson
Mr. Doug Theobald
Mr. Jeremy Weaver

Iowa

Facilitators

Mr. Jerry Chizek - County Extension Director, Webster County

Panel Participants

Mr. Doug Adams
Mr. Dean Black
Mr. A.J. Blair
Mr. Neal Hoefing
Mr. Gregg Hora
Mr. Todd Lundgren
Mr. Steve Peterson
Mr. Doug Stanek
Mr. Brent Wells
Mr. Loren Wuebker
